DETAILED ACTION

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

Bales (US 5,781,615) teaches that when a terminating communication node (reads on the claimed second server) does not have resources (DSP resource and recording module) to record an incoming message for an unanswered call, the terminating node then determines a second communication node (reads on the first server) with recording resource and routes the call to the second communication node for the recording (column 4, lines 45-65). Bales further teaches that the terminating node, after determining that no resources are available, sends a request message to the second communication node to request the second communication node to record the incoming message (figure 7, step 708; figure 8, step 802; figure 9, steps 901, 902, 908-913; column 9, lines 1-20). Since the second terminating node (first server) already receives a request message to record the incoming message, there is no need/ motivation for the second communication node to determine whether the terminating communication node is available or not before the recording.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
